

Xentio and Freightsight form strategic alliance

BI consultancy firm and Leading transportation consultancy cross leverage their Business Intelligence domain expertise.

March 06, 2009 – Xentio LTD., a business intelligence consulting and IT solutions firm, and Freightsight LTD., a leader in transportation consulting and solutions, today announced the formalization of a strategic alliance between the two companies. The partnership combines transportation expertise and products from Freightsight with the strong advisory and business intelligence implementation capability of Xentio to address large-scale technology projects within both major transportation and telecommunication services institutions.

Freight sight provides consulting and solutions targeted to the transportation sector, and delivers unmatched enterprise-wide transparency to logistics organizations faced with the need to consolidate global operational data into a unified view.

Xentio is well reputed for its proficiency in providing business intelligence consultancy and business analysis services, as well as project organization for the implementation and management of large scale business intelligence projects.

Combining the domain focused knowledge and implementation expertise of Freightsight, with Xentio's strong consulting and program management, will allow both companies to deliver end-to-end business intelligence solutions. The partnership between Freightsight and Xentio is welcome news to companies who are looking to streamline business processes and reduce costs in an integrated fashion.

"Freightsight was introduced to Xentio's capabilities through a shared top tier global logistics client," said Steve Keil, CEO at Freightsight. "The partnership between Freightsight and Xentio works to combine and extend the offerings of both our companies."
